2¼" Memory Foam
¾" High-Resiliency Foam
2¼" Charcoal Infused High-Resiliency Foam
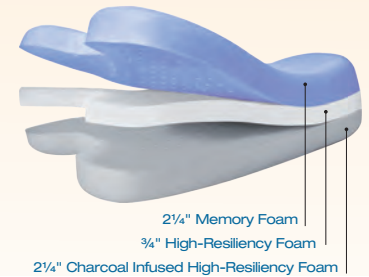

BEFORE

AFTER

Mask shifts and rubs as it comes in contact with an ordinary pillow causing discomfort, leaks, noise, and more.

CPAP hose twists, drags. and pulls on mask.

Lack of support can cause poor sleeping alignment.

Custom side cutouts improve mask fit and reduce interference and slippage.

Hose tether keeps weight of the hose from pulling and allows the user to move freely.

Ergonomically designed to provide support for improved positioning and easy breathing.
